Tried, tested.

Bigger, better.

Welcome to the new Nissan Micra. Yes, it looks better. Yes, it feels bigger. But there's something else you should know. In developing it, no other car in its class has been so painstakingly planned or so rigorously tested.

The resulting list of new features is impressive. From those on the outside, such as re-styled front grille, side mouldings and head-lamps. To those on the inside, such as

a new dashboard, new seat design and eye-catching new fabric.

And isn't it good to know that four adults can comfortably enjoy the same levels of relaxation normally reserved for much larger and more expensive cars? And that you can have a choice of either a 3-door or 5-door version?

Coming from Nissan, great performance is equally evident. A choice of two aluminium, 16-valve petrol engines takes care of that. While a driver's airbag, side impact door bars and state-of-the-art Nissan Anti-Theft System (NATS) provide high levels of safety and security. Even more importantly the stopping distance has also been improved on the new 1998 Micra.

Last, but not least, we've introduced a truly innovative concept. On the brand new Micra, you can add your very own finishing touches. Once you've chosen your model, whether it's the Equation, GX or Si, you can add any number of optional upgrades. Even better, you get to select your own paint finish from a fresh and exciting palette of colours.

The result? Three simple steps. One great Micra.

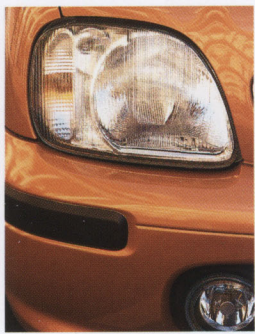

Style.

You've either
got it or you haven't.

Large front headlamp for better visibility.

Style

And make no mistake, with the new Micra you most definitely have. In fact, here you'll find the perfect combination of refinement and robustness.

The first features you'll notice are on the outside. The sleek,

sculptured one piece bonnet, the larger, chunkier headlamps.

A quick glance at the front and sides reveal

sporty looking body coloured

bumpers, which when

combined with new side

indicators and roof mounted aerial,

give a leaner, longer appearance.

Should you choose the GX or Si models, then a body

coloured rear spoiler and new side mouldings come as standard.

So much for the exterior then, what about the interior? Step inside and prepare to luxuriate in two words Nissan hold close to their heart. Space and comfort. Everything you see about you has been carefully considered to

provide just that bit more room. Everything around, under and

above you has been deliberately designed to

offer just a little more relaxation.

Whichever way you look at it, the new Micra looks

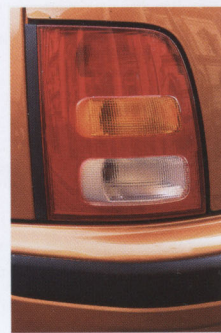

dressed for work, play and evening.

So, if you're looking for a car that fits both

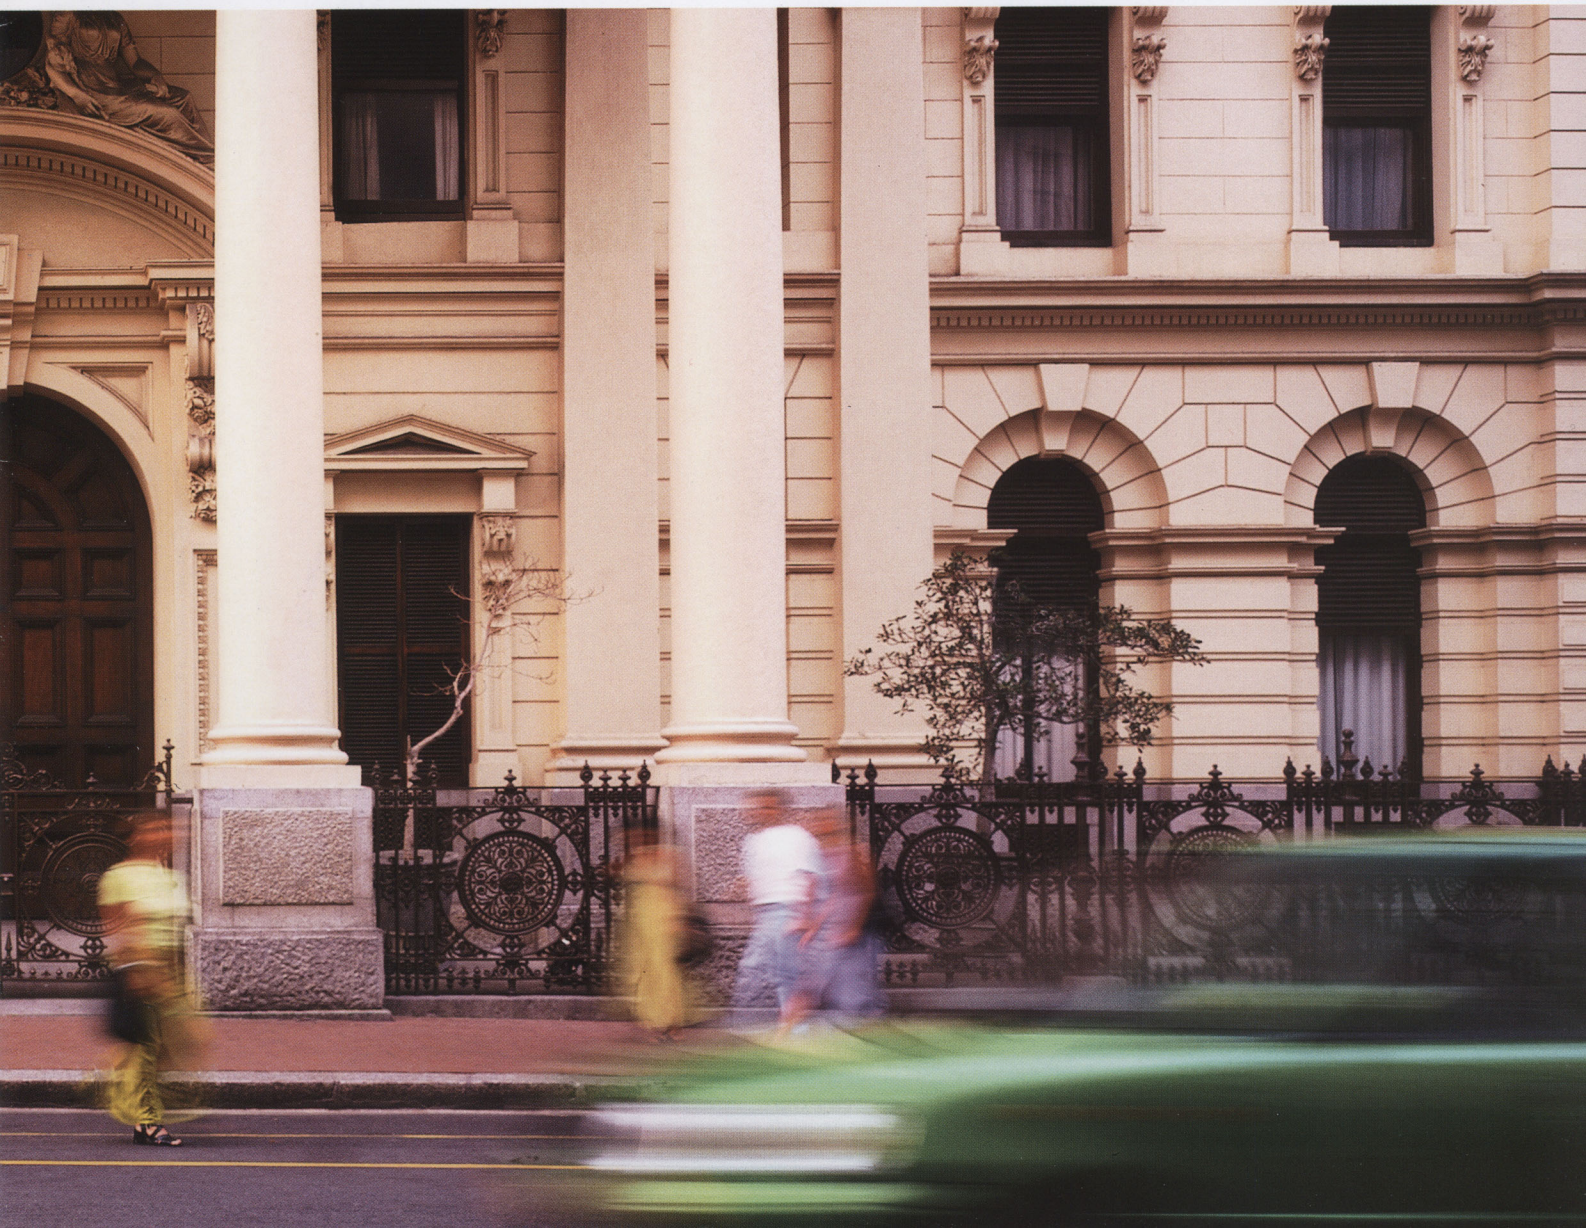

you and your lifestyle look no further. You've just found it.

Chrome "flying wing grille".

Stylish rear combi lamps.

The new *Micra* The inside story.

Interior

Slip inside the new Micra and one word springs immediately to mind. Quality.

Quality in the well thought out use of space. Quality in the way your instruments and dials have been conveniently placed so using them becomes effortless. And quality in levels of comfort that can't fail to impress even the most demanding driver.

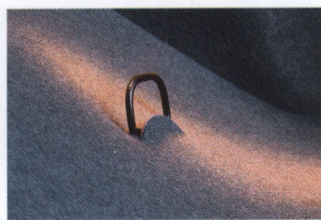

The fact is, from start to finish, everything has been conceived for your convenience. Every last detail tested for your utmost comfort.

Rotary dials are easier to use. The attractive two-tone dash has illuminated pointers for instant reading (a feature incidently, found rarely in small cars). And the highly accurate fuel gauge comes with a welcome audible warning when low.

Fine, that's the technical side of things. But these days find a driver who doesn't demand a little extra comfort? Well, not only have our designers and engineers recognised this, with the new Micra they've exceeded themselves.

Glove box contains handy pen holder.

Boot space contains four handy luggage hooks.

When you consider, for example, that even its new seat fabric has undergone rigorous tests for durability, wear and comfort you'll start to get some idea of the exceptional standards we've set ourselves.

The very latest in seat-bonding technology not only provides comfort and travelling pleasure it does something more. It helps to create a unique interior that's as roomy and

spacious, as it is stylish and chic.

In your new Micra you'll discover storage compartments. In the doors, under the steering column, on the dashboard. There's even a glove box with penholder, and hooks in the boot to help tie down luggage.

To pamper you still further, air conditioning is also available on most models. Tinted glass as standard provides good vision at all times. And to ensure an environment that's light and airy, soothing and comforting, a tasteful, two-tone colour scheme is employed

All this combined with improved soundproofing, gives whisper quiet noise levels which are rarely found on a car in this class.

An unrivalled *performance.*

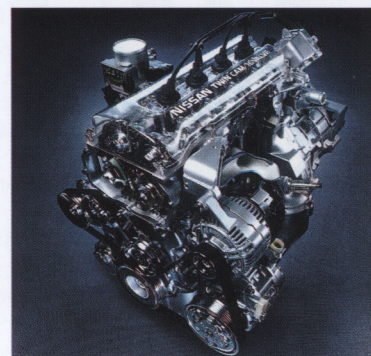

Performance

Of course, the Micra's performance has always been impressive. With the launch of the latest model it can only be described as exceptional

Whether you're cruising around the city or enjoying the open road, the New Micra is a car that knows no boundaries. It has the power to put you in control of every situation. From overtaking to pulling away. From traffic to joining a motorway.

16 Valve performance and excellent fuel economy for both 1.0 and 1.3 litre engine.

The aluminium 1.0 litre and 1.3 litre 16 valve,

twin-cam petrol engines are controlled by an ingenious computerised engine management system. Making them smooth, fuel efficient and highly responsive, even at low and mid speeds. In fact, the New Micra has one of the best fuel consumption figures in its class.

The smooth 5-speed manual transmission is a revelation, allowing you to drive the way you've always wanted to. Or alternatively, you can choose the very latest generation automatic transmission, NCVT (Nissan Continuously Variable Transmission). By using computer control to match your driving style, its smooth operation delivers the best results in terms of performance and fuel efficiency.

Take control of
your life.

Handling

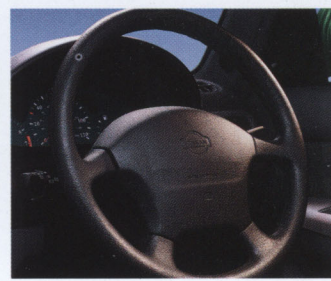

The journey through life can be full of surprises. And when it is, it's best to be prepared. Rest assured, the New Micra is with you all of the way.

With 5-link rear suspension and independent front suspension, the maximum amount of tyre contact with the road is ensured at all times. What does this mean behind the wheel? It means a reassuring sense of control when you need it most, the ability to change lanes quickly to avoid potential trouble, to steer round an unexpected obstacle or brake suddenly while cornering.

Drive into the city and you'll notice its compact dimensions are ideal for getting in and out of those tight parking spaces. All this is made even easier by one of the

Maximum grip for accurate cornering and straight line stability.

Four-spoke steering wheel provides better grip.

tightest turning circles around.

Order your new Micra with power steering then you'll find it simpler still. The system has the double advantage of easy manoeuvrability at lower speeds and a good steering feel at higher speeds. It also offers excellent feedback and response and helps you feel more in tune with the road.

As at every stage of the new Micra's development, the

testing levels have been second to none. Take noise levels for instance, vibrations and harshness have been improved to the point of near silence, due to greater engine refinement and increased sound proofing.

Members of our testing team were even keen to ride inside the boot and listen for squeaks and rattles!

The new Nissan Micra. Truly tried and tested.

Your Micra.

Your choice.

Choice

Not only are Nissan dedicated to quality, we're dedicated to something equally as important. Choice.

With 3 different grades available - Equation, GX and Si, you can adapt your New Micra to fit your lifestyle exactly. You simply select the 'model' that's right for you and then specify the extras you want with our Upgrade Packs.

There are 7 Upgrade Packs available covering audio, safety, city, security, comfort, air-conditioning and sports.

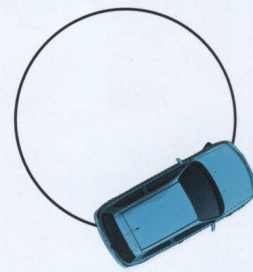

Choose 'Audio' and you gain a boot mounted Sony 10 disc multi-play CD player. Choose 'Comfort' and you can enhance your driving enjoyment with a tilt/slide sunroof and power steering. Choose 'Sports' and you can add

to your New Micra's head turning ability with alloy wheels, rev counter and body coloured mirrors and side mouldings. Simple.

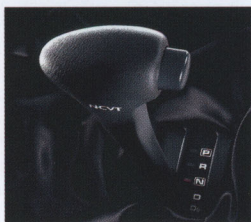

Adding the 'city' pack to the Equation model will give you the benefit of power assisted steering, central door locking and superlocking to add to the list of features standard on this model.

For extra peace of mind the 'Safety' pack includes a passenger's airbag and ABS. The Air conditioning option will improve your driving environment. And to ensure your New Micra stays yours, you can upgrade its safety features to include a sophisticated alarm.

The result? A unique new Micra perfectly suited to your needs.

The Micra has one of the tightest turning circles in its class-9.2m.

Nissan's Continuously Variable Transmission (N-CVT). Smooth automatic gear change for agile city driving.

Safety

features that are no accidents.

For highly visible brake warning, the Micra is fitted with a high mounted stop lamp.

Let's begin with accident protection (passive safety). The important improvement in this area is the introduction of a driver's airbag as standard. Pretensioner seat belts work with the airbags to restrain forward movement. While the availability of a passenger airbag on most models ensures the safety of front occupants.

Yet again, our designers and engineers set about their

S a f e t y

Rest assured, when it comes to the new Micra we've taken rigorous measures to help you avoid an accident and give you higher levels of protection should a collision actually occur.

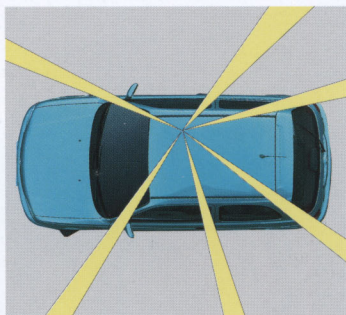

meticulous testing. Using the Cray II supercomputers and NASA stress test software they simulated real crash tests. And after that, they did some more. Not until they were entirely satisfied was the exercise concluded.

In the event of an accident, front and rear crumple zones, reinforced roof, pillars and sills and anti-intrusion door bars combine to form an incredibly strong passenger shell. And, although not legally needed until the year 2003, new frontal protection measures have also been included in the design of the new Micra.

For protection against side impacts, the armrest and door pocket have been blended together. The materials used have been developed to reduce the danger from splintering during impact.

Of course, it's not just adults that need looking after. Children need protecting, too. For this reason the rear seatbelts

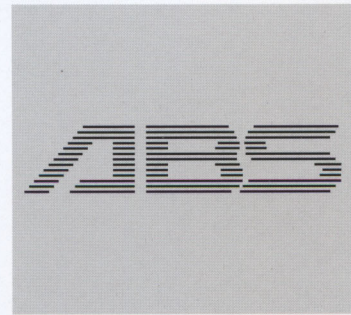

A c t i v e s a f e t y

To help you spot potential driving hazards, the Micra gives you excellent all-round visibility.

Panoramic door mirrors increase awareness of surrounding traffic and reduce blind spots.

To help you to maintain full control and steer around obstacles during emergency braking, the Micra can be fitted with 4-channel ABS brakes.

To help protect you during a frontal collision, the Micra is fitted with a standard driver's airbag. Passenger airbag is optional.

feature A/ELR (automatic emergency locking retractors), which locks the child seat firmly in position, especially during a collision.

To help you avoid an accident in the first place (active safety), the Micra offers precision steering, superb handling and confident braking. The optional 4-channel ABS (anti-lock braking system) has been developed during tests conducted on frozen lakes North of the Arctic circle.

Large windows offer exceptional all round visibility. While panoramic door mirrors offer you a better awareness of surrounding traffic, enhance rear visibility and reduce blind spots. Drivers in the cars behind you are given a more visible brake warning thanks to a high mounted stop lamp.

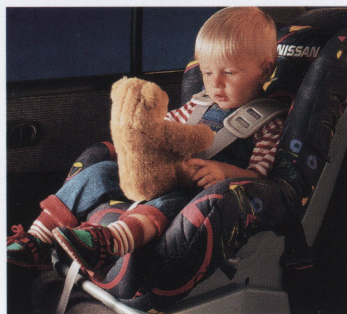

*"Keep them safe."
Do not fit a
rear facing child
restraint in a seat
protected by an
airbag.*

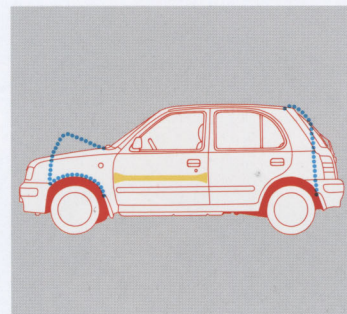

Passive Safety

To protect you during an impact, the Micra features front seatbelt pretensioners.

A/ELR rear seatbelts provide easier and safer child seat fitting.

The side door guard bars and front and rear crumple zones help absorb impact energy.

Equation.

Simply irresistible.

Micra Equation

In short, even the Equation grade Micra is just too irresistible for some. It's a vehicle with all the comfort, style and power features you need. One that combines these assets with driving characteristics that can only be described as outstanding.

There's a choice of 3-door or 5-door versions with either manual or automatic transmission featuring NCVT (Nissan Continuously Variable Transmission). For smooth, responsive performance and excellent fuel economy, there's also a choice of two engines, a 1.0-litre or 1.3-litre 16-valve, multipoint, fuel-injected petrol engine.

To protect you should a collision occur, a driver's airbag comes as standard, as does front height-adjustable seatbelts with pretensioners. For the safe fitting of a child seat in the rear, the entry grade Micra also features A/ELR seatbelts.

For your extra comfort, the Micra is fitted with tilt adjustable steering.

Specially upholstered and padded door panel for extra style and safety.

Other features include body coloured bumpers, tinted windows, tilt steering wheel and a rear window wash wipe. For your additional comfort and convenience, there's also a folding bench-style rear seat, large door pockets front and rear and luggage hooks in the boot.

To help you sleep easy at night, the entry grade Micra is secured by the highly acclaimed NATS immobilisation system. Plus, the 'City' pack option will add power assisted steering, central locking and superlocking to the list of features found on this model.

How can you resist?

Si.

No competition.

Micra Si

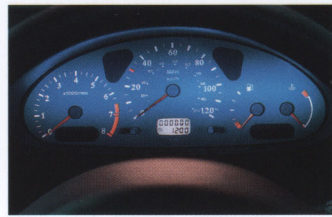

To be the best in any sport you need to push yourself to the absolute limits.

Which is exactly what our testers did with this latest version of the Micra. Its body has an athletic beauty that wins the eye. And its lively 16-valve, twin-cam, multipoint fuel injected, aluminium petrol engine has enough energy to take on the toughest journey.

Exterior styling is complemented by distinctive alloy wheels, full body coloured bumpers and newly designed side mouldings. A matching roof spoiler finishes off the rear.

Inside you'll find a 6-speaker stereo/radio cassette system and electric front windows.

You'll also discover the seats are covered with an attractive two-tone wave pattern trim. The instrument panel features a coloured rev counter. And, to help carry a variety of items of all

Coloured combi meter with tachometer.

Audio tweeter in front pillar for enhanced sound reproduction.

shapes and sizes, the rear seats split 60/40.

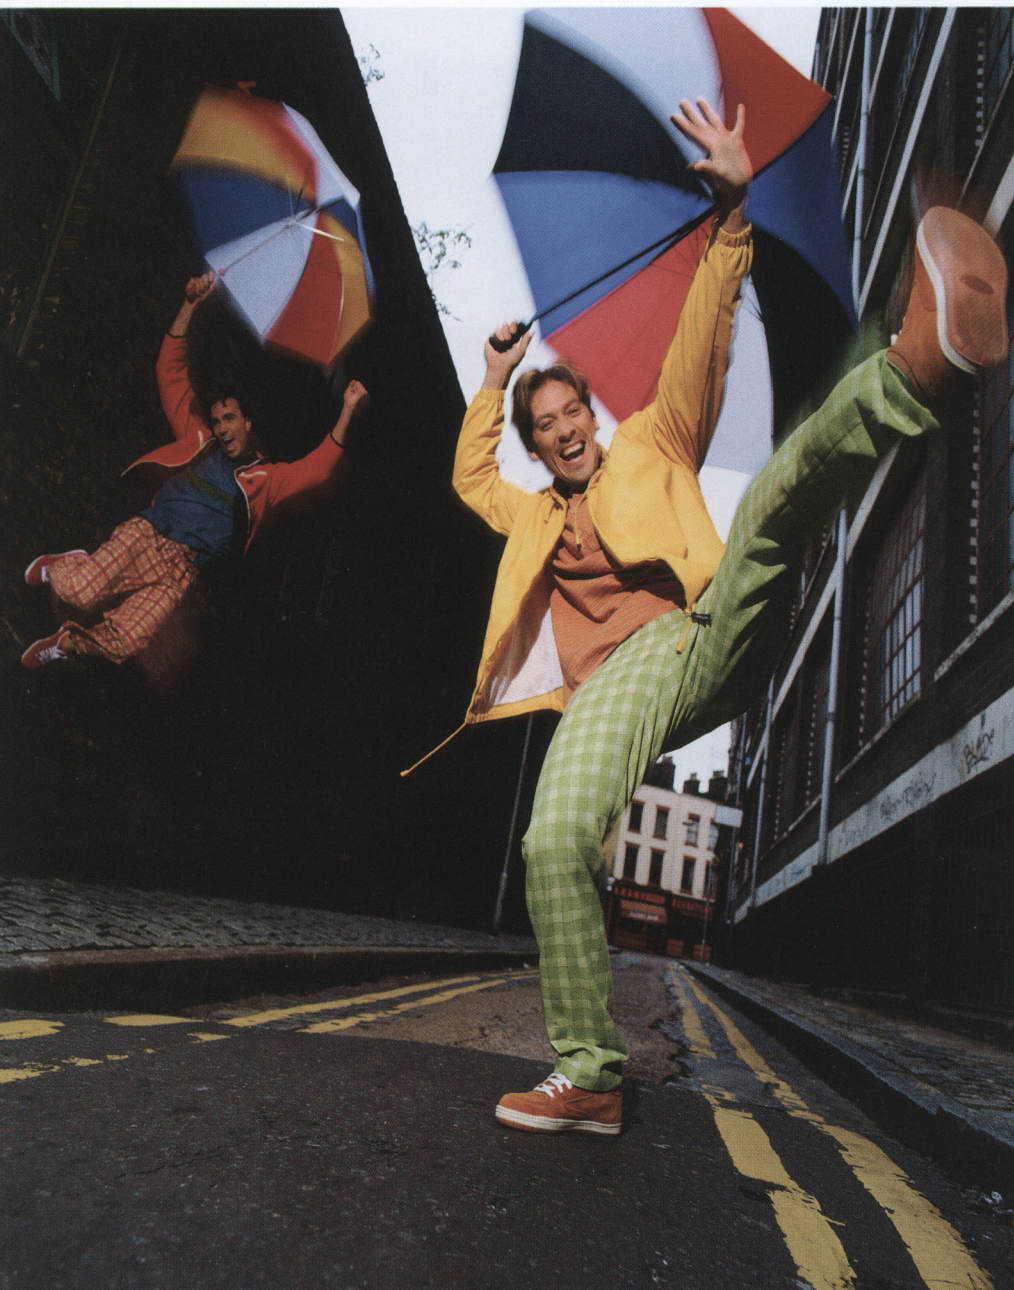

Safety and security are also high priorities on the sports grade. You'll find a driver's airbag and central door locking fitted as standard. Adding the Safety pack will give you the extra reassurance of a passenger's airbag, plus an Anti-lock Braking System (ABS). The beauty of ABS? It helps you steer while braking around the trickiest of obstacles.

Nissan's very own, highly acclaimed Anti-Theft immobiliser System NATS is also fitted as standard.

GX.

*All the comfort
you need.*

Micra GX

With the Micra GX grade you can be prepared to be pampered.

Both the 3-door and 5-door versions have a choice of two engines, a 1.0-litre and 1.3-litre 16-valve, fuel-injected petrol engines. Both are available with either manual or automatic NCVT (Nissan Continuously Variable Transmission).

Naturally, you'll find the levels of refinement impressive throughout. For instance, power assisted-steering, electric front windows, sunroof and remote central locking all come as standard features. Each adding that extra touch of luxury.

Inside, you'll find a healthy appetite for storage, with large door pockets on both sides. Rear side door pockets in the 3-door version. And a 60/40 split rear seat means there's enough space to carry all sorts of large objects.

Rear seats split 60:40 for extra carriage convenience.

Rear boot features handy inside tailgate handle for easier closing.

A convenient tailgate handle that opens and closes the boot, makes loading and unloading easy. Even better, a handy lever at the side of the driver's seat, will remotely open the fuel lid.

A body coloured roof spoiler and bumpers add a touch of exterior styling. A driver's airbag and Nissan's highly regarded NATS immobiliser system combined with superlocking gives a sense of unrivalled security.

All the *protection* you need.

Security

Stealing your heart is one thing, but theft of your vehicle

NATS Nissan Anti-theft System is activated by the ignition key. is quite another.

You have to admire our conviction.

Not for us vague, simple, second guessing. At Nissan we send ourselves down to the source of the problem itself. Car thieves. There's not a trick in the book we don't know about, thanks to hours spent interrogating them.

The efforts have been worth it. Today the Nissan Micra is protected from theft by the highly acclaimed Nissan Anti-Theft System (NATS). The NATS system is highly advanced and uses a complex rolling code to prevent 'code grabbing'.

Turning the immobiliser on and off requires no specific action by

the user, except simply inserting or removing the specially coded ignition key. The engine will then only start if the code matches the vehicle's rolling code security system.

Your Nissan stereo system will also be an unlikely target for thieves as it too is linked to the immobiliser system. If stolen it cannot be used again.

Superlocking and keyless entry are standard features on both the Si and GX models, as is central locking which can be

activated from a range of about 5 metres by the key fob.

For even greater peace of mind you can upgrade your Micra's features with the 'Security pack' which includes a sophisticated alarm system.

*Nissan Anti-Theft System
logo is fitted to every Micra.*

Accessorise.

Fully accessorised Micra with roof bars and surfboard holder, Cosmic alloy wheels, pillar decals, overfenders and wind deflectors.

Accessories

Add a touch of luxury with a coloured interior panel and silver gearshiftknob.

Fashions fade, but personal style never changes.

This is the joy of owning a Nissan Micra. And now more so than ever. The pleasures of choosing the model,

package, options and colours that are just right for you. Then tailoring it to your own specifications with an extensive range of genuine Nissan accessories.

Of course, the accessories featured here are just a small part of our extensive range. For further details, pick up a copy

Give your Micra that extra aerodynamic appeal with a body-coloured roof spoiler.

At Nissan, we never forget that we became one of the world's top motor manufacturers by making a total commitment to our customers. Responding effectively to their changing needs and expectations remains the basis of our company philosophy.

Which means keeping operations local. We've already invested £1.25 billion in the UK and created 4,000 jobs in what is probably Europe's most efficient car plant, in Sunderland.

And that massive investment is more than justified by results. The Micra, voted Car of the Year in 1993, is made in the UK and the Queen's Award for Export has been won for three successive years by exporting British built Primers and Micras to 36 countries, including Japan.

MEETING AND EXCEEDING YOUR EXPECTATIONS.

Meanwhile, at our technology centres at Cranfield in Bedfordshire and Sunderland, Tyne and Wear, we harness the very best European and Japanese technology to keep Nissan cars at the forefront of automotive development.

In January 1992, Nissan set up a distribution, marketing and sales operation in the UK. Investment in our strong dealer network is ongoing, bringing a new pan-European identity to all sites. Over 70% of cars sold in Britain are manufactured in Europe.

With a level of after-sales commitment unrivalled in the industry, Nissan have always believed that manufacturing excellent vehicles is where our responsibility begins, not ends. The European Parts Network was established to this end, providing supply of any part not in stock at a Nissan dealership.

So if you didn't think you could find a manufacturer committed to quality and customer service, with a range of cars to meet every need and an unrivalled level of after-sales support, you'd be wrong. You can ... with a Nissan.

YOU CAN WITH A NISSAN

Nissan Assure includes all of the following benefits – some of which may be the reasons why you chose your Nissan in the first place.

Three year or 60,000 miles manufacturer's warranty.

Six years anti-corrosion warranty and first 3 years paint warranty.

Free roadside assistance for the first year of your vehicle's life – this is increased to three years if you choose a Nissan QX.

Accident Management – a scheme which helps you, in the unlikely event of an accident, to deal with insurance companies and to organise the repairs.

Menu Pricing – which enables us to provide you with a more accurate and quicker quote for any servicing, maintenance or repair work required.

Peace of Mind – we always guarantee our workmanship and any replacement genuine Nissan parts and accessories required have a minimum of one year's warranty.

As part of the worldwide Nissan family, we have access to all the replacement genuine Nissan parts and approved accessories you will need.

Our technicians have been trained by Nissan to work on your vehicle, and they are the Nissan specialists. They use the latest equipment to ensure your vehicle is given the best treatment!

Nissan in Business is a service dedicated to the Fleet and Business markets to ensure a consistent and quality approach via a network of distinct Nissan dealerships. Each dealer has invested in a team of professional staff to ensure a tailor made package for fleets of all sizes.

The Nissan Motability Programme developed in association with the registered charity Motability. It enables those with difficulty getting around to obtain selected models on preferential terms.

**NISSAN
FINANCE**

Nissan Finance offers a wide range of flexible finance schemes to meet the needs of both our retail and business customers. Preferences, Hire Purchase, Nissan Contract Hire and Finance Lease, all offer the in-built flexibility to make the package tailor-made to meet your individual needs. We also provide added security to your finance agreement, with a comprehensive range of payment protection plans. Ask your dealer for details.

**RAC Insurance
Direct**

Nissan Motor Insurance in association with the RAC is a service exclusive to Nissan drivers offering a high quality insurance. Every policy is personalised to suit your individual needs. For a competitive quote, call the Quoteline free on: 0800 57 58 59 for mainland UK or 01232 232 640 for Northern Ireland.

This brochure is for general guidance only and its contents do not in any way constitute an offer or representations by Nissan. While all reasonable efforts have been made to ensure the accuracy of the information provided, due to Nissan's policy of continuous product improvement, all particulars contained are subject to constant revision and Nissan reserves the right to change, alter or modify, among other things, specifications, colours and prices of models, without any notice at any time.

Accordingly you should consult your local authorised Nissan dealer for the exact introduction dates of all models and for the most current information.
